■ INFRASTRUCTURE ASIA 2010 - THE EXHIBITION

Infrastructure Asia 2010 is Asia's premier infrastructure forum. An exclusive B2B exhibition, IA 2010 offers an unparalleled platform for governments, businesses and leading experts to meet, to discuss and to find solutions for the prioritization, procurement and presentation of existing and future infrastructure projects in Asia Pacific.

It has been estimated that the global economy will need US\$ 30 - 40 trillion of infrastructure investment over the next 20 years, of which in the next 10 years Asia alone will account for over \$US 6 trillion. Asia Pacific is the world's largest and most populated region where developing sustainable infrastructure is regarded by governments as the most important and vital issue of today. The realization that developing an efficient and sustainable economic infrastructure depends on the achievements of a rapid and coordinated multinational public and private approach, guarantees the success of future income-generating infrastructure investments in the region.

INFRASTRUCTURE ASIA 2010

WILL FOCUS ON FIVE LIFE-CRITICAL INFRASTRUCTURE INDUSTRIES:

- Transportation infrastructure.
- Energy infrastructure.
- Water and Waste Management infrastructure.
- Communications infrastructure.

EXHIBITORS PROFILE

If your business operates in any of the following areas and is involved directly or indirectly with infrastructure related projects or supporting services and is seeking to be actively involved in Asia's infrastructure planned developments, contact the organizers to find out how your company can benefit from the event. Exhibition areas on the floor plan will be categorized alongside National Priority Project oriented showcases. Key contractors, support services & technology providers from the following categories are encouraged to register for the exhibition:

- Civil Design, Construction & Engineering.
- Environmental & Green Industries.
- Government's National and Regional Projects.
- Human Resources, Health & Education.
- International Aid & Trade.
- Legal, Tax, Project Management, Actuarial.
- Merchant, Investment Banks & Institutional Investors.
- Oil and Gas Exploration, Processing & Distribution.
- Power Generation & Distribution.
- Telecommunications, Mobile and Information Technologies.
- Transportation and Logistics (Road, Rail, Port, Airport, Tunnel & Bridge).
- Water, Waste Management & Agricultural Irrigation.

Annual US\$ 600 Billion Infrastructure Investment Made Available. Maximize Your Market Share To Benefit From Asia Pacific Economic Infrastructure Growth!

■ INFRASTRUCTURE ASIA 2010 - THE CONFERENCE

In the current economic climate, the availability of quality infrastructure is the critical issue and major factor for global businesses. The challenges and constraints of the global crisis have generated a devastating impact on “life critical industries” and are threatening the core of future infrastructure improvements and required investment. Public & Private Partnerships (PPP) will deliver new, efficient and sustainable growth when developing complex infrastructure projects. By leveraging available public funds in Asia Pacific and accessing global private funds & resources an upswing in Asian infrastructure markets will now follow.

Infrastructure Asia 2010 is an unparalleled G2B & B2B forum with conferences, project & country presentations, and technical seminars alongside a major trade exhibition. With an expanded agenda the event will provide world class forum for both senior government officials from Asia to meet with global business leaders, as well as for technical experts, procurement officers and projects managers to discuss the latest innovations in support of infrastructure development. Both public and private sector participants will convene together where strategies & plans for developing Asia Infrastructure will be presented and the full spectrum of opportunities for getting involved can be best explored.

THE CONFERENCE WILL:

- Promote the latest national policies & regulations on infrastructure in the Asia-Pacific region.
- Present the newest infrastructure initiatives & “ready to go” projects for tender from across Asia .
- Outline “best practices” towards project development and transparent tendering & procurement
- Address key issues for minimizing investment risks and facilitating infrastructure investment.
- Discuss current economic conditions & availability of financing infrastructure investment.
- Analyze the availability of relevant skills in the infrastructure sector.
- Provide business meetings and tailored social events towards maximizing both G2B & B2B Networking opportunities amongst all participants.

Over 2,000 senior government officials, global business leaders, technical experts and project directors are expected to participate in this Asia-Pacific Forum.

INFRASTRUCTURE ASIA 2010 CONFERENCE & EXHIBITION

IA 2010 will accelerate critically needed dialogue between public and private sectors and will bridge multilateral cooperation for infrastructure development across Asia Pacific.

IA 2010 will establish a clear communication channel between governments and businesses in disseminating the latest infrastructure development priorities, national and regional policies.

IA 2010 will create a fluid environment for government, bilateral/multilateral infrastructure funds and agencies to co-develop strategies for public and private sector businesses to collaborate on critically needed large scale infrastructure investments.

IA 2010 will facilitate a direct access for businesses to current and future infrastructure projects and will open dialogue for the continued identification and removal of political, economic & operational obstacles in securing investment towards Asian infrastructure development.

IA 2010 will enable project developers and decision makers to tap in the widest range of available relevant skills, services & technologies in support of infrastructure development across Asia.

IA 2010 will provide technology and service suppliers from both private and public sector with an unparalleled opportunity to promote their products and services to the largest audience
