

### *More information on PIARC Technical Reports*

The reports produced by PIARC Technical Committees aim to:

- set out the state-of-art practices, or the situation in PIARC member countries, on different topics dealing with road and road transportation; and
- draw recommendations on best practice.

The reports are published in both English and French, but there are a few exceptions. Some reports have been translated into Spanish.

In the virtual library, you will find for each technical report, a:

- description form;
- table of contents; and
- pdf file of the report.

The reproduction of PIARC publications is only allowed for personal use. A request for any partial or total reproduction of a PIARC technical report in a publication, whatever the medium of that publication, shall be submitted in writing to the PIARC secretariat at: [info@piarc.org](mailto:info@piarc.org) and shall mention precisely the reference of the report from which it has been extracted.
