

A meeting point for road infrastructure managers

Santiago - Chile

Organized by:

Supported by:

International Conference HDM-4

Designed as a meeting point for road management professionals, this event will deal with topics such as the development of the HDM-4 software, the regional and international experience on its application and calibration, and its usefulness in implementing a sustainable policy for Asset Management.

Target audiences

The congress is aimed at professionals of road infrastructure development and management, and will cover the planning and pre-investment assessment stages, design, construction, maintenance and operation.
