EDITORIAL

From February 8 to 11 2010, the transportation community will meet in the city of Québec for the XIII International Winter Road Congress!

www.piarcquebec2010.org

Online registrations can be made on the conference Web site at www.piarcquebec2010.org. Register before **November 13, 2009** and take advantage of lower rates!

Winter service stakeholders have less than two months until the 13th edition of this large-scale event. Over 1,500 participants will attend. There is an impressive program.

28 TECHNICAL SESSIONS

Technical issues will be discussed during the 28 sessions coordinated by the World Road Association Technical Committee B5. The topics are based on selected papers and organized into 6 themes covering issues of sustainable development, climate change, road safety, levels of service, information management during winter, and snow removal techniques.

TWO SPECIAL SESSIONS

The Congress has decided to invite municipal and national policymakers to speak providing the opportunity to present their plans for the future in response to the concerns of the general public regarding the safety and efficiency of transportation systems in terms of the environment.

The Winter City Mayors' Session—a first for the Winter Road Congress—will provide an opportunity to learn about the approaches and measures taken by municipalities in various countries regarding the “economic governance of winter service from an urban mobility perspective”.

At the **Transportation Ministers' Session**, the ministers will explain within their own particular context, “how to promote winter mobility adapted to the climate”.

QUÉBEC EXPERTISE

Congress participants will be able to evaluate Québec's expertise regarding winter service through invitation to one of seven technical visits.

INTERNATIONAL EXHIBITION AREA

The exhibition area includes 11 national pavilions: Québec, Canada, Nordic countries, France, Italy, Japan, Korea, Switzerland, Spain, the United States and Andorra. It is the ideal opportunity to become familiar with expertise from around the world in fields related to winter service.

Your opinions and comments to

Friedrich Zotter: friedrich.zotter@bmvit.gv.at

OUTDOOR EQUIPMENT DEMONSTRATIONS

Thanks to an outdoor demonstration of snow removal vehicles in action, Congress participants will be able to assess the capabilities of this equipment under actual winter conditions.

RECEPTION FOR PIARC NATIONAL COMMITTEES

In order to emphasize their essential role in the smooth operation of the Association, members of the PIARC national committees present in Québec will be invited to socialize at a reception in the international exhibition area that will be jointly coordinated by the chairs of the Canadian and Québec National Committees. More details to come!

NEW: AN INTERNATIONAL SNOWPLOW CHAMPIONSHIP

This will be the first time that a PIARC Winter Congress will host an International Snowplow Championship! One team from each member government may participate.

You may find information on the Congress, registration and your stay in Québec on the official Web site of the Congress: <http://www.piarcquebec2010.org>

Friedrich Zotter

Representative of National Committees on the PIARC Executive Committee

NC news, events, seminars & conferences

CENTENARY ACTIONS OF PIARC NATIONAL COMMITTEES

PIARC National Committees continued to celebrate the 100th anniversary of the Association through various publications, events and other actions.

In Mexico special celebrations have been organized. 2009 is also the year of the 35th anniversary of AMVITAC. In Burkina Faso the occasion has been commemorated with a special presentation and in Benin a centenary presentation was held during the Road Maintenance week in October 2009. Italy has organized many different events this year of which the occasion PIARC centenary was included. In November 2009 a seminar was held in Mali. In Japan, a special celebration was held on October 7 2009.

AUSTRIA

A joint meeting of the National Committee members with the First Delegate, the Austrian representatives in PIARC Technical Committees and board members of the National Transport Research Association (FSV), followed by a dinner concluded the PIARC centenary celebrations of the Austrian National Committee.

www.fsv.at/piarc/index.html

CANADA

The Canadian National Committee (CNC) of PIARC organized a Technical Session as a part of the 2009 Annual Conference of the Transportation Association of Canada (TAC). Presentations are available at www.cnc-piarc-aiPCR.ca.

During this TAC Conference, the CNC in cooperation with Colas Canada set up a meeting area called "Road Stop" in order to promote the CNC, PIARC and the centenary of the association. Representatives of the Canada-Quebec Committee joined the CNC and promoted the 13th International Winter Road Congress, which will be held in Quebec City in February 2010. www.piarcquebec2010.org

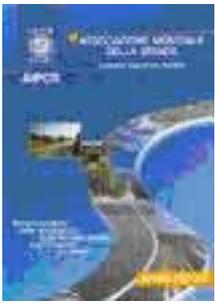

FRANCE

To celebrate the centenary of PIARC, the French Committee of PIARC, the General Secretariat of PIARC and the History Committee of MEEDDM have united in an effort to organize one study day entitled "The owners of road networks at the cross road: new governance, new perspectives". This will take place in Paris, November 19, 2009. After a brief retrospective it identified emerging issues and challenges related to road and road transport and investigated how to implement key developers in France or abroad.

For further information contact: cf-aipcr@lcpc.fr

TO BE CONTINUED

ITALY

The Italian National Committee continued the celebration of the PIARC centenary at the C4 Road Tunnel Safety seminar in November 2009 and started the preparation of the 2010 National Italian Road Congress, to be held in Aquila towards the end of 2010. www.aipcr.it

SLOVENIA

In honour of the PIARC 100th anniversary the Slovenian National Committee organized a one-day conference on the "Slovenian Road Development – History and Prospective". This will take place on November 11, 2009, at the Brno Conference Centre.

The conference included a review of 100 years of Slovenian road building and a vision for the future. The president of the Slovene Parliament, Mr. Pavel Gantar and Secretary General of PIARC, Mr. Jean-François Corté addressed the conference attended by approximately 200 high-ranking representatives, CEO-s and experts of the Slovene road sector. The vision of the state road infrastructure development was presented by Mr. Gregor Ficko. Furthermore, a booklet of the event was prepared by Mr. Miran Marussig. The conference was concluded with awarding giving ceremony and a short social event in the Congress Centre Lobby.

For further information please contact: sekretariat@nc-piarc.si

SWITZERLAND

The 2009 Annual conference of the Swiss National Committee in Berne, November 12, contributed to the PIARC centenary with a keynote speech of Olivier Michaud, Honorary President of PIARC. Within the overall conference theme of "Road Safety", experts from Switzerland, Germany and Austria presented new developments in EU-standards, road safety inspection, black spot management and road safety audits. Congress papers are available at: www.vss.ch

We will summarize all the centenary actions of PIARC National Committees in the next issue of this newsletter.

AUSTRALIA AND NEW ZEALAND

Australasian Road Safety Conference

11 – 13 November 2009 in Sydney

The 2009 Australasian Road Safety Research, Policing and Education Conference was held in Sydney. The Conference is Australasia's premier annual road safety event and provided a key forum for the exchange of information about current and future road safety initiatives. The 2009 ISA Conference showcased the latest ISA technology, progress on ISA systems development world-wide, the progress of speed zone mapping and management systems and presented the latest trial results from around the world. The first international Intelligent Speed Adaptation (ISA) Conference, a one day event, was held in conjunction with the national conference on November 10, 2009.

For more information go to www.roadsafetyconference2009.com.au

BELGIUM

Transport Research Arena – Europe 2010

7 – 10 June 2010 in Brussels

The main theme of TRA 2010 is "Sustaining Road Transport Mobility through innovation in Europe". Indeed, a breakthrough in technologies and research is important to answer demands for a sustainable road transport system, particularly considering that the road transport sector is a major contributor to the economy and society at large.

The TRA provides a platform for transport research in Europe. It is most attractive for the research industry and to those who have to implement the results of research into transport: namely road administrations at national, regional and local levels, contractors, as well as vehicle manufacturers and fuel producers.

The conference programme will be organized into six pillars built around the European research and innovation strategies with emphasis on climate change, CO₂, fuel efficiency and supply:

I. European Road Research Needs and Agendas.

TO BE CONTINUED

- II. Transport, Mobility and Infrastructure.
- III. Safety and Security.
- IV. Energy, Environment and Resources.
- V. Design and Production (Vehicles and Infrastructure)
- VI. Societal Importance of Road Transport.

The conference will be held at the newly opened 'SQUARE, Brussels Meeting Centre', right in the heart of the city in the vibrant Mont des Arts district, between the Royal Palace and the world famous Grand'Place. With three large auditoria and a 4.000m² exposition hall, the facilities are world class for such a forum.

More information is available on www.traconference.eu/

BENIN

Road Maintenance Week

25-31 October 2009, Cotonou (Benin)

From 25 to 31 October 2009 a "Road Maintenance Week" was held in Cotonou, Benin. The conference was part of the centenary actions of the Benin National Committee in order to celebrate the 100th anniversary of PIARC.

The programme of the conference and information on the presentations is available at: www.entretienroutier.com/

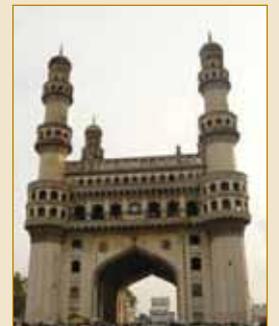

INDIA

PIARC International Seminar on Sustainable Maintenance of Rural Road

21 - 23 January 2010 in Hyderabad

Rural Roads are a key component of rural development since they provide access to economic and social goods and services, thereby generating increased agricultural income and productive employment. Rural Roads are used as an entry point for poverty alleviation as there is a growing body of empirical evidence that links transport investment to the improved well-being of the poor. Transport was also identified as being highly relevant to the achievement of a number of the targets set under the Millennium Development Goals (MDG).

The main objective of the Seminar is to provide a common platform for practitioners to share experiences and deliberate issues and challenges associated with the planning, provision and maintenance of rural roads in a sustainable way. Innovations with respect to involving local communities throughout the process also form part of the overall objective of the Seminar. The Seminar is being organized by Technical Committee A.4 (Sustainability of the Road Transport System - Rural Roads Systems and Accessibility to Rural Areas) together with the Government of Andhra Pradesh. The seminar is open to the whole world community dealing with rural / low volume roads and maintenance. It is also expected to address more specifically, the needs of the countries in the region and those having similar climatic, geographic and socio-economic conditions.

For further information read the final announcement at:

<http://www.piarc.org/library/aipcr/8/2798,Announcement-India-Jan-2010-FINAL.pdf>

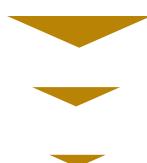

MALI

Human Resource Management, Governance and Public Procurement

8 - 10 December 2009 in Bamako

This international seminar is organized jointly by the Mali Government, the African Road Maintenance Funds Association (ARMFA), the Association of African Road Managers and Partners (AGEPAR) and the PIARC Technical Committee B.1, 'Good Governance of Road Administrations'.

More information available at: www.piarc.org/library/aipcr/8/2867,Annonce-B1-Mali-E.pdf

SPAIN**4th International Symposium on Highway Geometric Design**

2 – 5 June 2010 in Valencia

The Symposium will focus on the latest research, policies and innovative practices related to geometric highway design and their safety and operational effects. Symposium participants will leave the meeting with insights that stimulate continued improvements to geometric highway designs. This Symposium is the latest in a series of successful Symposia that have been held in Boston in 1995; in Mainz, Germany, in 2000; and in Chicago in 2005. The Symposium will feature technical papers, country reports, workshops, and an exhibition area.

For more information, please consult the Symposium website at www.4ishgd.valencia.upv.es

**Other NC activities and examples of good practice****ANNUAL CONFERENCE OF NATIONAL COMMITTEES**

23 September 2009 in Incheon

The meeting was chaired by Mr. Friedrich Zotter, Representative of PIARC National Committees on the Executive Committee. PIARC President Mrs. LECLERC welcomed the delegates in an introductory speech and stressed the importance of National Committees and the benefits of having one in each country. She encouraged National Committees to develop innovative forms of presentation for the upcoming PIARC congresses, especially the 2011 World Road Congress in Mexico City. She further outlined the importance of National Committees for marketing the association's benefits to existing members and those interested in becoming members.

Mr. ZOTTER highlighted recent contacts with representatives from Niger, Papua New Guinea and Malaysia, among others, which were considering founding new National Committees. Then he reported on his attendance as National Committee representative in the Executive Committee meetings in Mexico City and Glasgow and his participation in the commission meetings in Incheon. National Committees are requested to support the Communication and International Relations Commission in main items of the proposed communications strategy:

- Make results of the work of the World Road Association available and easy to access to all interested parties.
- Develop open, attractive and interactive internal and external communications to better serve the work processes of the Association.

The themes of the Minister's Session and the Strategic Linking Sessions at the 2011 Mexico World Road Congress were decided in the Strategic Planning Commission meeting. Respective papers including the Call for National Reports will be drafted. Also, ideas to provide a quicker start of the Technical Committees work between the working cycles were debated.

Then Mr. ZOTTER gave an overview on the National Committee's activities as presented in the Activity Reports 2009 and the National Committees Newsletter, with accentuation on the activities and events related to the PIARC centenary. Read more in the individual Activity Reports: www.piarc.org/en/national-committees/

Next, Mr. ZOTTER raised the question of participation of National Committees in the upcoming PIARC congresses in Quebec, 2010 and Mexico, 2011. In Quebec, all National Committees that do not have their own individual country pavilion will share a common booth with the PIARC General Secretariat. Concerning the World Road Congress in Mexico, various ideas of representation were raised and discussed, such as a common booth like the 2007 World Road Congress in Paris and a special session as in Durban 2003. For most representatives it was evident that the National Committees should definitely be mentioned in the congress materials, especially in the congress program. The NCs representative will prepare a proposal, evaluate it with the NCs Working Group established in Incheon and consult all National Committees before the next Executive Committee meeting in February 2010 (Québec).

Mr. SZIRANYI, the secretary of the Hungarian National Committee and member of the Terminology Committee presented the use of the PIARC Terminology Website and explained the various tools. Have a look at: <http://termino.piarc.org/search.php>

Within the forum, the possibility for National Committees to have two pages in each issue of Routes/Roads for their content was one point of discussion. However, the possible content has to be considered carefully. Mr. Corté stressed the importance of Routes/Roads as a communication medium. Finally, 4 countries volunteered for the first 4 issues: Australia, France, Burkina Faso and Belgium.

TO BE CONTINUED

Mr. Kidnie presented recent results from the CIRC. A new information brochure about PIARC is being developed. In the brochure the benefits of being a PIARC member should be clearly displayed. Also, the output of Technical Committees will be presented in a more comprehensive way. Its aim is to extend the network and to establish the World Road association as leading forum of the road industry. Mr. Appel welcomed these efforts, because at the moment it is somewhat difficult to appropriately present the benefits of being a PIARC member.

The meeting ended with a presentation on Burkina Faso's activities.

CANADA

As soon as the directives of the PIARC 2011 prize competition for the Mexico City Congress are announced, the CNC will launch the national competition, including the terms and conditions for participation. At the CNC's request, the Canadian Society for Civil Engineering has agreed to manage the national competition and establish a selection committee.

CANADA QUEBEC

Every year, the AIPCR-Québec Committee holds a competition awarding prizes to the authors of the three best submissions. The 10th competition will be launched in fall, 2009. Prizes will be awarded at the next AQTR annual congress in April, 2010.

More information at: www.aqtr.qc.ca

IVORY COAST

Meeting of PIARC Technical Committee A3

For two days, experts from Africa and Western Countries, as well as delegates from the World Bank, EU and ADB have worked on "Economic aspects of road networks and social development." For the chairman of the Technical Committee, Mr. Albero Compte Anguela, this meeting has prompted reflection on the roads and their contribution to the economic development of states and well-being of their populations.

At the opening ceremony, the Chief of Staff of the Ivorian Minister of Economic Infrastructure, Konan Adrian explained that the meeting in Abidjan contributed to the international repositioning of the Ivory Coast. PIARC is a platform for exchange of expertise and analysis and discussion of all matters relating to the road sector. This was the first PIARC meeting to be held in the Ivory Coast.

"Now, in succession of the Abidjan meeting the Ivory Coast is to develop a local PIARC (national) committee as an instrument of thoughts and suggestions."

FRANCE

The French National Committee of PIARC in partnership with APAQ Normandy (Association for the Promotion and improvement of the Quality of work and Road equipment in Normandy) organized a day on "Urban mobility, shared space, safety for vulnerable road users" in Rouen on October 20th, 2009. This day targeted at elected officials and technicians of design offices and private companies was organized in the form of an exchange of experiences, French and foreign initiatives in order to show under various angles how to manage the complexity of the subject.

The 2009 Meeting Day of the French National Committee (CF) of PIARC will be held in Paris on Wednesday December 9th, 2009, intending to enable all members of the CF-AIPCR to meet and exchange with the French experts (and their respective French mirror groups) represented in 8 Technical Committees of PIARC.

The day will consist of two main sequences:

- The morning: a plenary meeting, followed by workshops in each mirror Committee
- Afternoon: presentation of each mirror committee's agenda in a plenary session as well as a reflection of the Technical Committee's work.

UNITED KINGDOM

The United Kingdom National Committee has re-designed its web-site, offering more information and interesting features. A newsletter was published in summer 2009.

Read more at www.piarc.co.uk and see below

NC Publications and software

SPAIN

Nº 132 of the Magazine Rutas, the Spanish Road and Transport magazine has been published in June 2009. It contains reports on new motorway sections in Spain, technical articles such as on the use, development and evaluation of ITS-systems, interviews with outstanding Spanish road professionals and a preview on future seminars and congresses.

Information at: www.atc-piarc.com/rutas

UNITED KINGDOM

Summer 2009 Newsletter

The Summer 2009 Newsletter of the United Kingdom National Committee includes:

- a chairman's report on increasing interest about PIARC membership from companies,
- a report from the First Delegate on a high level of synergy between PIARC work and what's happening in the UK,
- a report on the Annual General Meeting,
- Technical Committee news,
- a news section with various reports on keeping roads open in severe winters,
- UK road safety strategy,
- International road development,
- the WRA-UK 2009 Congress in Birmingham entitled "It's a Risk Business - In these changing times how do we deliver a consistent service the travelling public?"
- announcements on PIARC congresses.

14th International Winter Road Congress in 2014

At its meeting in Incheon (Korea), 2009, the Council of PIARC selected the candidacy of Andorra for the organization of the 14th International Winter Road Congress in 2014. Switzerland was thanked for its excellent proposal.

24TH WORLD ROAD CONGRESS 26 – 30 September 2011, Mexico City

The XXIVth World Road Congress of the World Road Association will be held in Mexico City from 26 to 30 September 2011 at the Banamex Conference Center.

The themes of the Minister's Session and the Strategic Linking Sessions were defined in the PIARC meetings in Incheon, September 2009. The draft for 13 Special Sessions is in progress as well as the Call for Individual Papers and National Reports.
