Organisation et structure

The Professional Association for Roads and Bridges was designed to be the National Committee of PIARC in Romania.

Organisation and structure

2. Conférences, séminaires, réunions des CT en 2010

2. Conferences, Seminars, TC meetings in 2010

Organisation des CN: nationale/internationale

Organisation by NCs: national/international

On June 4, 2010 we celebrated 20 years since the establishment of the Professional Roads and Bridges Association in Romania (The National Romanian Committee of PIARC) with a festive meeting that took place in Belciugatele. We shared memories, stories and we remembered personalities that are no longer among us. Since 1990 up to the present, the A.P.D.P activity constantly evolved. The Subsidiaries developed, the attributions and the social and professional role of road and bridge engineers was finally appreciated for its true value. There were Congresses, counsels, technical-scientific meetings. There were proposals, initiatives, and strategies. In a world where everybody is thought to be good in the field of roads, A.P.D.P. proved that only by scientific knowledge, professional respect, and hard work can the field activity be fully recognized and appreciated. After two decades of activity, the generations change on the way, but the ideals and aspirations mainly remain the same. They focus on the love, respect and devotion for the professions of road and bridge engineer.

Travail conjoint avec d'autres organisations nationales

Joint organisation with other national institutions

On July 9, 2010 the lie 2010 the scientific symposium C.A.R. Road research and administration was held in Bucharest, organized by A.P.D.P. together with the Technical University of Engineering in Bucharest, The Faculty of Railways, Roads and Bridges. The symposium sections were:

1. Research in the road field, with the following theme:
 - Laboratory and field investigation of the quality of road materials
 - Researches in the field of transportation infrastructure
 - New technologies used in the field of roads
 - Assessment and certification in the field of roads
 - Monitoring the exploitation behavior of roads
 - Administration and management of road works
2. Traffic safety, with the following theme:
 - Policies to increase traffic safety on the road network
 - Traffic safety in the urban area
 - Technical solutions to increase traffic safety, applied in road projects
 - Interdisciplinary collaborations regarding traffic safety.

The purpose of the symposium was to organize debates that make the connection between research themes, in-field and laboratory road material quality investigation methods, traffic safety problems and management of the activity in the infrastructure of road transportation based on strategies and efficient budget allocations.

Réunions des CT	TC meetings
<p>Between 14-15 June 2010 there was the middle strategic cycle work reunion in Timisoara of the Strategic D Theme of the World Road Association (AIPCR/PIARC), "The quality of road infrastructures".</p> <p>Each Technical Committee President presented the activity of the committee they managed. Important problems were discussed, problems that appeared in the activity of the Technical Committee during the first half of the work cycle, such as the participation of TC members in work reunions and in the work carried out within the committees, the organization of international seminars, the development stage of the work schedule of the committees and necessary measures to prepare the next world congress.</p> <p>We discussed the content of a standard report form comprising all information that must be transmitted to the Strategic Planning Commission for a better coordination and harmonization of the activity in all Strategic Themes of the Road Association.</p> <p>Then other important aspects were discussed on the agenda of the work reunion, such as the stage of development of the current work plan and the problems related to the questionnaire elaborated by the General Secretariat of AIPCR/PIARC regarding the future Strategic Plan for the cycle 2012...2015.</p> <p>A great attention was given to the preparation of the XXIV World Road Congress that will take place between 26...30 September 2011, in Mexico City. We discussed the outlook of the participation of the Technical Committees of the Strategic D Theme in the Strategic Session and the Special Sessions of the congress and propositions were made for the Sessions of the Technical Committees.</p> <p>In the end of the work meeting, prof. dr. eng. Gheorghe LUCACI drew some conclusions that took shape after the discussions between the Presidents and Secretaries of the Technical Committees:</p> <ul style="list-style-type: none"> - It is desirable and we support the proposition of the Executive Committee and of the Strategic Plan Commission to advance the work schedule for the future cycle 2012-2015; - It is possible and necessary to organize a reunion of the Strategic Theme Coordinator with the team of Technical Committee Presidents and Secretaries which they will coordinate from the very beginning of the strategic cycle; - It is desired to maintain and develop the technical aspect of the problems tackled by the Technical Committees; - It is recommended to increase the role of the First Delegate and of the National Committees in increasing the awareness of the persons nominated to become members of the Technical Committees in terms of importance of participation in the work sessions of the committees they will be part of; - As for the organization of international seminars, it is desirable to have an effective participation not only of the members in the host countries, but also in the area.
