Seminar and Training Course

Quantitative Risk Assessment Model for Dangerous Goods Transport through Road Tunnels

1st and 2nd February 2007, Paris, France

This Seminar and Training Course is organised by the PIARC Technical Committee C3.3 Working Group 2: Management of tunnel safety and Ineris.

The **1-day Seminar (1st February)** will provide an introduction to the DG-QRA Model developed by PIARC and the OECD to evaluate the risks of dangerous goods transport through road tunnels. The topics will include the background to the development of the DG-QRA, an overview of the new ADR regulations and associated risk assessment requirements, and a description of the technical capabilities of the software. Case studies will be presented for a number of countries including France, UK, Greece, Austria.

Language: English

The **following 1-day Training Course (2 February)** will provide an introduction to and hands-on experience of using the QRA Model to study practical tunnel applications.

Language: English
