

TC A.2 – Road Transport System Economics and Social Development

Issue A.2.1 Project evaluation methods	
<i>Strategies</i>	<i>Outputs</i>
<p>Investigate reliability of travel time savings (and other aspects) included in appraisals of road investments.</p> <p>Investigate the broader impact of road investments in LMIC with a focus on employment effects.</p>	<p>State-of-the-practice report on the methodologies, complemented by case studies from a range of member countries.</p>
Issue A.2.2 Ex-post evaluation of projects	
<i>Strategies</i>	<i>Outputs</i>
<p>Investigate and document how ex-post evaluations are conducted after completion of a road project (new projects and rehabilitation) and how results of the evaluations are used.</p>	<p>State-of-the-practice report on the methodologies, complemented by case studies from a range of member countries.</p>
Issue A.2.3 Special Project on capturing the contributions of road transportation	
<i>Strategies</i>	<i>Outputs</i>
<p>Craft the terms of reference needed for a request for proposal on a Special Project to identify, investigate and capture the contributions of road transportation towards sustainability and economic development to support decision-makers, including the assessment and management of socioeconomic externalities such as changes in demographics.</p> <p>Once a proposal is selected, manage the project and serve as liaison with the General Secretariat for final delivery and dissemination.</p>	<p>Terms of reference to support a Call for Proposals on a Special Project.</p>
